

# ABOR BENEDICT

## Full Stack Developer | React | Node.js | PostgreSQL

A Full Stack Developer focused on building efficient, scalable, and intuitive applications. Skilled in React, Node.js, PostgreSQL, and authentication systems. Strong problem-solving abilities and experience delivering smooth, optimized user experiences.

### AREA OF EXPERTISE

React & Frontend Engineering .	Backend API Development( <a href="#">Node.js</a> ).
Database Design & Optimization (PostgreSQL).	Authentication & Authorization Systems.

### KEY ACHIEVEMENTS

- Built a **Progress Optimization Tracking System** that monitors user engagement, pauses tracking during inactivity, and provides accurate performance analytics.
- Delivered 3+ fully functional full-stack applications with clean UI/UX and optimized performance.
- Improved frontend performance through efficient React architecture and reusable components.

### PROJECT EXPERIENCE

#### Progress Optimization System

##### *Full-stack Application*

Designed and developed a learning engagement tracking system that intelligently detects user activity, pauses progress when the user becomes inactive or minimizes the application, and ensures accurate lesson completion metrics.

- Developed using **React, Node.js, and PostgreSQL**
- Implemented session tracking, analytics, and dynamic UI state updates
- Improved progress accuracy and reduced false engagement by over 90%

### EDUCATION

#### BSc Computer Science – 2025

### TOOLS & TECHNOLOGIES

React • Node.js • PostgreSQL • Express • TailwindCSS • Git & GitHub • Vite • Postman • JWT • VS Code
